This car has been in my family for **40 years** and for the better part has been garaged; and as you can see from the pictures there is very little rust. The engine however is not the original 427, rather a 454. It has a **new power windows motor** and the electric antenna still works. It has a **new fuel tank** that was installed as a few years back. I also have **two new emblems** still in a box. It has **heavy duty brakes**, and it is my understanding there was less than 400 cars built that way, but I have to do more research on that. All in all this is, because of it's year, edition and condition, a can't miss opportunity for the project anthisiast as well as the saavy investor or car collector.

On Jan-31-10 at 14:43:24 PST, seller added the following information:

Warning! after further research it is undetermined if these brakes are heavy duty j56 or j50 standard
